

Fungal flora of Panhala^{1,2}

A. N. THITE AND A. R. KULKARNI³

Department of Botany,
Shivaji University, Kolhapur

Panhala hill fort (16°48' N, 74°8' E), is situated 13 miles south-east of Kolhapur city in Maharashtra. The altitude at the base of the fort is 856 metres and the plateau 398 metres above sea level. The annual rainfall varies from 187 to 200 cm and most of it is received between June to September. March-April are the driest months. Occasional showers start from May. The temperature goes upto 32-33°C during the hotter parts of the year, particularly in April-May; and falls to 25-26°C during December-January. The temperature fluctuation is about 7°C throughout the year.

Panhala is being developed as a hill station, and a number of new buildings are being constructed. The population is increasing fast. This already has had an adverse effect on the natural vegetation of this place. Possibly within next 15-20 years the area may lose a number of its important plants. It was, therefore, felt that an estimate of its present flora may be useful.

In this paper only the fungal flora is given. The fungi are arranged alphabetically under their respective classes. The total number of species listed during the period 1971-1972 are

Phycomycetes 35, Ascomycetes 125, Basidiomycetes 120 and Fungi imperfecti 150.

PHYCOMYCETES

- Albugo bliti* (Pers.) Kuntze. On leaves of *Achyranthes aspera*, *Alternanthera sessilis*.
A. candida (Pers.) Kuntze. On *Raphanus sativus*.
A. evolvuli (Damle) Saeed & Thirum. On leaves of *Evolvulus alsinoides*.
Albugo portulacae (DC.) Kuntz. On leaves of *Portulaca oleracea*.
Bremia graminicola Naoumoff. var. *indica* Patel. On leaves of *Arthraxon serrulatus*.
Choanephora simsoni Cunn. On flowers of *Zinnia elegans*.
Circinella spinosa van Treghe. & Le Monnier. On fruits of *Artocarpus integra*.
Mucor indicus Linder. On dung.
M. mucedo (L.) Brefeld. Causing soft rot on *Annona reticulata*, *Arachis hypogea*.
Peronospora parasitica (Pers.) de Bary. On leaves of *Raphanus sativus*.
P. rumicis Corda. On leaves of *Rumex vesicaris*.
P. trigonellae Gaum. On leaves of *Trigonella foenumgruecum*.
Physoderma aeshynomeni Thirum & Whitehead. On submerged portion of *Aeshynomena indica*.
P. commelinae Lingappa. On leaves of *Commelina forskalaei*.
